

OTT Subscriber & Revenue Dashboard

Executive Dashboard Report
Data Period: January 2023 to December 2024

Purpose

This report summarizes subscriber scale, revenue performance, regional contribution, and churn behavior for an OTT service. The accompanying Power BI dashboard allows the results to be filtered by year, plan type, and region.

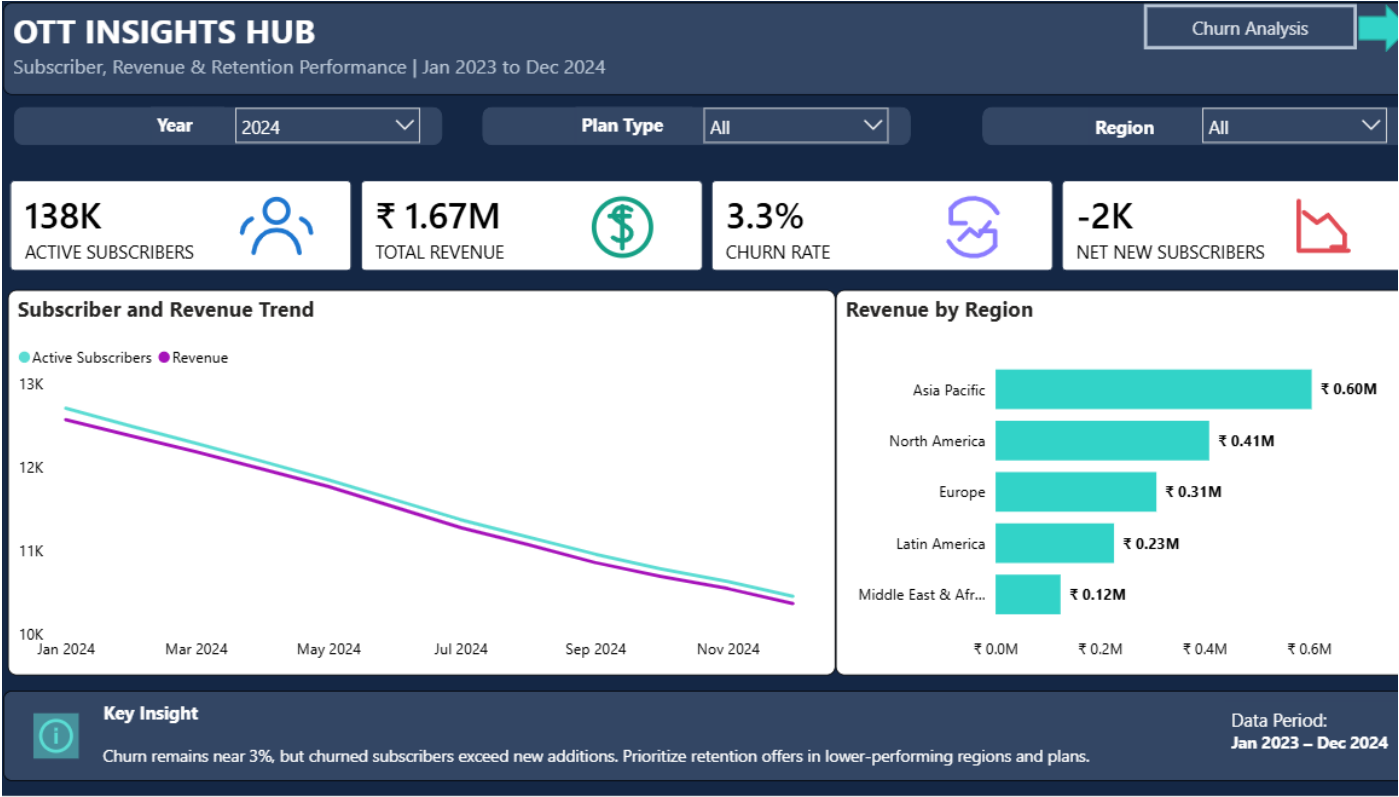

2024 dashboard snapshot	Business interpretation
138K active subscribers	Subscriber base to retain and grow
■1.67M total revenue	Revenue generated under the selected 2024 view
3.3% average churn rate	Retention is a key business priority
-2K net new subscribers	Churned subscribers exceed new additions

Recommendation

Offer targeted retention bundles in lower-performing regions and plans. The goal is to reduce churn and restore positive subscriber growth.

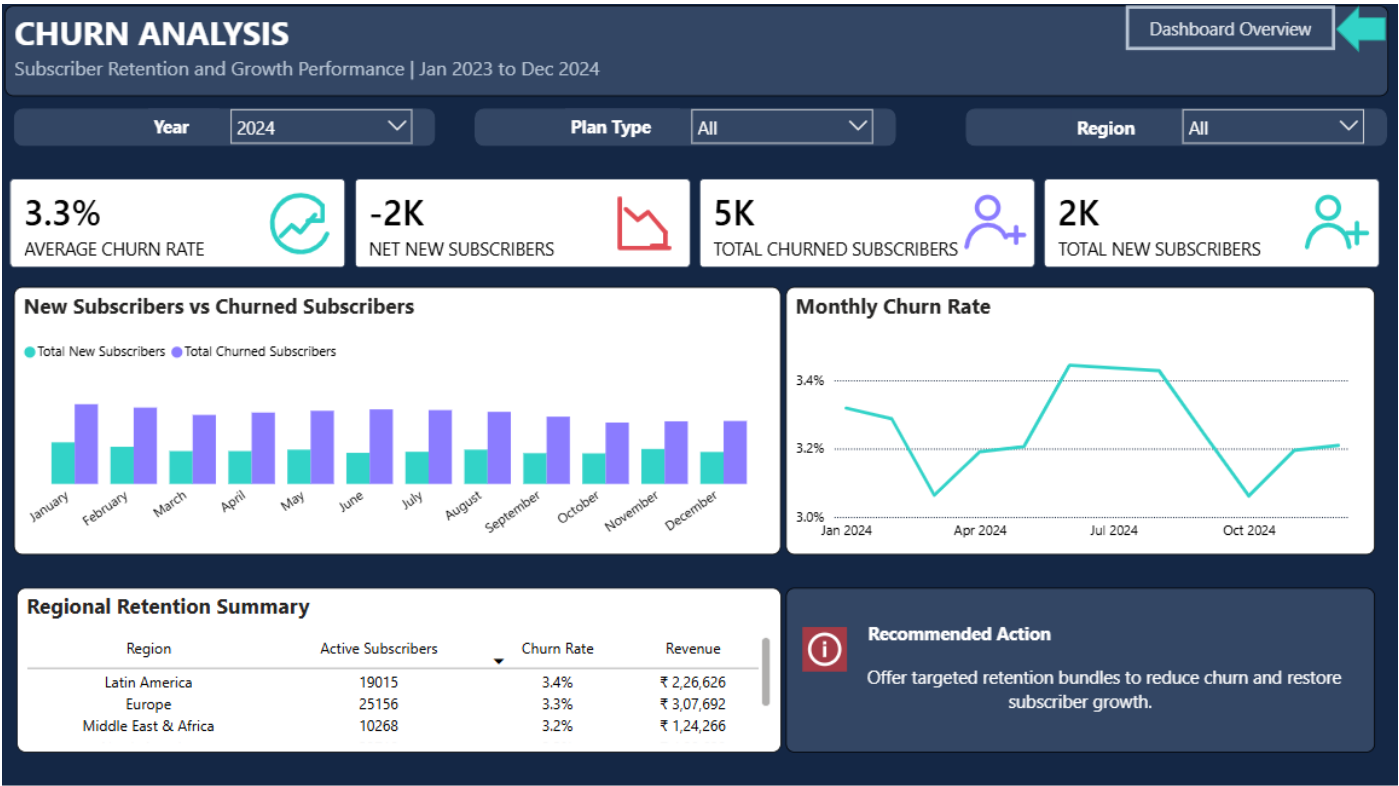

Dashboard Overview

The overview combines core KPIs with subscriber and revenue trends, regional revenue contribution, filters, and a key insight.

Churn Analysis

The churn page compares new and churned subscribers, tracks monthly churn rate, and provides a regional retention summary and action recommendation.

Interactive filters: Year, Plan Type, and Region. Use the page navigation control to switch between dashboard pages.
